Local News

Rev. C. W. and Mrs. Anderson and daughter left on Friday for a three week holiday at Salmon Arm, B. C.

Garnet O'Neill is home again after undergoing treatment in a Vancouver hospital.

Mr. and Mrs. Paul Beebe and children of Forestburg, Alberta are visiting at the home of Mr. and Mrs. E. Fraser.

Cecil Walker spent a few days recently at the home of his mother, Mrs. E. E. Walker.

Mr. and Mrs. T. Bland and family left on Wednesday to spend a two week vacation in Saskatchewan.

Mr. and Mrs. J. Caille and daughter leave on Saturday to spend a two week holiday at Sylvan Lake.

Well drillers are busy in town drilling wells for Mr. Gemmill, Eric Hopkins and J. J. Massie.

Miss Mary Beddoes is the latest addition to the local telephone exchange staff.

Flugg Ballam has taken Len Pullan as his assistant and has fixed up rooms over the store for living quarters.

Mr. and Mrs. J. C. MacDonald and daughter, Lola, of Vancouver, are visiting at the home of Mr. and Mrs. R. G. Shantz.

Inspector Bruce Ramsey of the Department of Municipal Affairs spent last Friday in the Village office on his annual inspection trip.

Mr. and Mrs. H. H. Mumby and family left Monday for Orin where they will spend a two-week holiday at the home of Mrs. Mumby's parents.

The Calgary School Division Board are considering a general overhaul of the local school. Contractors were here last week looking the place over for repairs.

Mr. and Mrs. Earl Devins and daughters of Grand Prairie are visiting the latter's parents Mr. and Mrs. F. Moscop in Calgary.

P. J. Cormier of Winnipeg is the relief agent at the CPR depot while the regular staff are on holidays.

Norman Rowat has bought the house from H. McIntyre's homestead and has moved in on to the lots formerly occupied by the Emerson Lumber yard.

Fred Elhard is home recuperating after undergoing an operation recently. Mrs. M. L. Nichol is a patient in the Holy Cross hospital undergoing treatment.

Free T.B. Chest X-Ray Survey

Every man, woman and child in the Crossfield district will be given an opportunity of safeguarding their health by having a free chest x-ray when a community x-ray survey begins here about the end of July. At a recent meeting arranged by Mr. E. Baxter of the Alberta Tuberculosis Association, several organizations of the district undertook to sponsor this survey and the following officers were elected to carry it out. Chairman of the general committee is Ernest Tweedale, president of the Canadian Legion, Crossfield. In charge of Mrs. Wm. Aldred, representing the Home and School and the U. P. W. A. Allotting of times and dates will be in charge of Mr. H. Mumby and Harry May in charge of registration. It is hoped that every citizen of the Crossfield district will take advantage of this special opportunity and registration for the survey is being done as fast as canvassers can be found. Parts of the district have been covered and cards are available in each store in town and at the post offices in Maden and Des Plaines. When filled in these same cards may be left at the same place or may be dropped into the post office and the committee will get them. Don't wait for someone to call on you with a card, get one and fill it in. One card cannot get a card family and if you cannot get a card phone in and someone will bring one to you. Further plans regarding the Crossfield survey will be announced as they are completed. In the meantime, public health officials are most anxious that everyone give the project their whole hearted support and co-operation. With this co-operation they are convinced that Crossfield will be well up in the forefront of Alberta communities in the prevention of tuberculosis.

There are two reasons why local residents should make appointments for their chest X-rays. First, because it is good to know that one's chest is healthy; and second, the discovery of the disease in the early stages means complete recovery if correct treatment is begun at once. Tuberculosis is one of the most curable of diseases if it is not too far advanced when discovered and if prompt treatment is given. Thousands of people are cured every year. The longer that the treatment is put off the greater the risk is to the patient and to everyone around him. Remember that this service will not cost you one cent the entire cost being borne by the Alberta Tuberculosis Association which is financed by the sale of Christmas seals.

BORN — To Mr. and Mrs. Earle Richardson, twin sons, on July 2nd, in the Holy Cross hospital.

Sports Club Meet

A meeting of the sports club was held in the Curling Rink on Friday last with but a small attendance. A report of the recent sports day showed it to have been quite a success financially with the dance and raffle both showing a profit. President McNaughton thanked all who had in any way contributed towards making the day the success it was. Arrangements were made to hold a dance every other week to raise enough to pay for the floor and the same orchestra has been hired. It was left to the grounds committee to look after the getting of the new piece of ground summer followed.

Mr. and Mrs. Arnold Mansell and daughter returned home last week-end after enjoying a three week vacation.

FOR SALE — Two Holstein Milk cows, good milkers, 4 and 7 years old, \$200, each. Airth and Hale, Phone R507 Crossfield.

WANTED — Interior painting and paper hanging. C. H. Evey, Carstairs.

Vindication Of Dieppe

WHILE THE INVASION OF DIEPPE, in which the Canadian army played a major part, occurred in August, 1942, it has continued to be a subject of interest in this country, and there are many who have never been fully satisfied as to whether the operation was worth the cost of the many lives which were lost in it. Recently, further light was thrown on the matter, when the official story "The Canadian Army in the Second World War" was published by the Dominion Department of Defence. Two chapters of "The Canadian Army, 1939-45" written by Col. Charles Stacey, Director of the Historical Section of the General Staff, deal with the Dieppe operation, and give many facts which show, that while the operation in itself was a failure, invaluable information was gained, which contributed much to the success of the invasion of Europe on "D" Day.

New Reasons For Failure

Not only was useful information gained, but the operation was of further value because, in view of their success in repelling it, the Germans believed that they could successfully beat back any invasion of the beaches. Events, following "D" Day demonstrated that the Germans had been misled by the attack at Dieppe into believing that the tactics they employed there would ensure their hold upon the continent. While most of the events of the operation have previously been published, some new information has been made public in the story published by the Defence Department, which shows more clearly why the attack failed. One of these was that it was decided not to provide heavy bomber support. "The elimination of this air bombardment removed from the plan the only element of really heavy support contained in it" the author states.

May Be Proud Of Undertaking

Another point of interest not hitherto emphasized was that Major General J. H. Roberts, Commander of the Second Canadian Division, was hampered by "limited and frequently inaccurate information," reaching him at his headquarters aboard a destroyer, concerning events on the shore. Only extremely exaggerated reports of successes on the main beaches decided him to land his floating reserve, which ran into withering fire. That there was some error in planning the attack is suggested in the part of the report which says: "It is difficult to avoid the conclusion that the planners underestimated the influence of topography and of the defensive weapons known to be numerous in the target area." In spite of these things, the value of the operation in planning the "D" Day invasion of 1944 has never been seriously questioned. In referring to that aspect of the event Col. Stacey writes, "That much criticized undertaking has made an essential contribution to the success of the most momentous operation of war ever attempted." For that reason, we may feel pride in the part played by the Canadian army in the attack, in spite of the fact that it was a costly failure.

FEED GRAIN EXPORTS BANNED IN B.C.

WINNIPEG.—The wheat board announced that export permits for shipment of oats, barley and mixed feed oats from British Columbia would not be granted until there is an improvement in supplies of feed grains on the west coast.

At the present time there is a heavy demand for feed grains in B.C. caused by flooding of pasture land and also by severed railway connection with prairie shipping points where feed grains are stored.

FAMILY COW KEEPS PIANIST'S FINGERS NIMBLE

CAPEVILLE, Tenn.—Twelve-year-old William Ellis says he owes his musical talents to the family cow. More than a year ago Bill's father suggested that the son milk the cow to keep his fingers nimble for the piano. Bill agreed, although he suspected that his father merely wanted to pass on the chore. "But," says Bill, "that cow's been keeping my fingers in shape. Now my three sisters want to help with the milking."

DISCIPLINE NEEDED

VANCOUVER.—Rt. Hon. C. D. Howe, trade minister, said there would be no reason to fear further rising prices if Canadians would submit to the same discipline in peace-time that they supported in wartime.

'Gully Erosion' Threatens Prairie Farm Lands

Here is the extreme results of "gully erosion" which threatens many thousands of acres of prairie farm lands. This field was bare summer fallow, with a loose topsoil, which resulted from many cultivations last year. These may be largely eliminated by the use of chemical weed control, which is believed to be an important development in the battle against soil erosion.

(Central Press Canadian) — A party of top-flight farm scientists met at Birch Hills, Sask., to consider one of the gravest problems that has yet confronted western agriculture. In an area of good land, where bumper wheat crops have been the rule for the past several years, the land is sick and in danger of a slow, lingering death. Water erosion, the cause of the "sickness", created the problem which the scientists are trying to beat.

Up in the Birch Hills country, and countless other places where the prairie land rolls in great sweeps, broken here and there by sparse poplar and birch groves, the problem is acute. The rolling land, stripped of its protective cover of grass, shrubs and trees, then worked for years on end, becomes susceptible to running water, which courses down bare hillsides, gouging out deep gullies, carrying down the priceless thin covering of topsoil, leaving the rocks and gravel showing.

Nature saw to it that the prairie bush country was protected against water erosion, but when man removed the protective material, he jumped into plenty of trouble. Nowadays, where rolling land has been cleared and cropped, the farmer is almost certain to face the problem in a year of heavy spring runoff, or during a heavy rainstorm in the summer when the land can't soak up the water as quickly as it falls, and it follows its natural tendency to run to a lower level.

The scientists at Birch Hills came to two important conclusions. One was that the land must be managed so that it has a protective covering of stubble or grass at all times during which it is vulnerable to water erosion, and that some radical reduction of cultivation is needed.

But a rich soil produces good crops of weeds as well as useful crops, and farmers have found it necessary in the past to cultivate summerfallow six, seven and even more times during the summer to kill off fresh growths of persistent weeds, which sap the soil moisture, choke out crops.

New Theory

That was the old way; but this year will see a new theory tried in the prairie provinces, and a lot of cultivation eliminated. Great hope

BABY BEEF CLUB—This line-up is the Ballinacra, Sask. Baby Beef Club, which won five out of the eight main classes for juniors at the recent Yorkton Fat Stock Show and Sale. Seen in the foreground is Lorne Neil with his champion Hereford steer, which brought him over \$500, at 54 cents a pound. There were 11 clubs competing at Yorkton, and the photo was made during the judging of groups of 10, when there were 110 fine calves in the ring.

THE TILERS

IT WILL BE A TREAT, GOING TO THE MOVIES WITH HUNK TONIGHT! INVITING ME PROVES HE ISN'T AS INDIFFERENT AS HE PRETENDS!

IT'S A PICTURE, AIN'T IT, MISS LORNA?

THIS HAS BEEN A WONDERFUL EVENING! HUNK—IT WAS VERY KIND OF YOU TO INVITE ME!

THINK NOTHING OF IT, HUNK! I'D LOVE TO HAVE YOU ALONGS!

THE CAR RADIO IS BROKEN, AND IT WOULD'VE BEEN A TERRIBLE LONESOME RIDE BY MYSELF!

Three Prairie Provinces Good Oil Prospects

EDMONTON.—In Manitoba, the southwestern corner of the province is thought to be a possible oil producing region. In Saskatchewan, the entire southern half of the province is underlain by sedimentary rock favorable for oil exploration but in Alberta virtually the entire province is considered by oil men to consist of potential oil land.

The exploration programmes of major Canadian and United States oil companies this year reflect directly the oil potential qualities of the three prairie provinces. There is some exploration planned and underway in Manitoba, more intensive exploration in Saskatchewan but the great majority this year will take place in the Province of Alberta.

Estimates by informed oil men vary greatly on the amount of money that will be spent in Alberta this year. These estimates range from \$30,000,000 upwards. Imperial Oil has announced that Henry H. Hewitson, president of his company will spend \$20,000,000 in Alberta in 1948.

Bigger and better VEGETABLES

Protect them with Great Cross Garden Guard, which contains 50% more rotenone than ordinary derris dusts. Deadly to insects, but non-poisonous to humans. It's the best for vegetables. 1-lb. size comes in a handy pump sprayer.

ROTENONE GREAT CROSS GARDEN GUARD

FOR MODERN PEST CONTROL

CANADA SENDS WHEAT GRASS TO AUSTRALIA

OTTAWA.—A supply of Canadian-developed wheat grass, specially selected for drought resistance, will be taken back to Australia by W. A. Meares of Forbes, New South Wales. The strain of grass, valuable for forage, was given him by the Dominion department of agriculture and is to be developed for Australian pastures.

SELASIE'S SYMPATHY

VICTORIA.—Emperor Haile Selassie I of Ethiopia has sent his sympathy to British Columbia flood victims.

FARMERS RECEIVE 700,000 TAX GUIDE BOOKS

OTTAWA.—Hon. J. J. McCann, revenue minister, told the commons 700,000 special income tax guide books have been placed in the hands of Canadian farmers.

Dr. McCann recalled his March announcement that farmers who report taxable income based on cash actually received and cash expenses actually paid out during the calendar year would not be required to fill out the net worth statement on the new 1947 prairie farmers' or farmers' return.

"Those farmers who reported income on an accrual basis for tax purposes will be required to submit a statement of assets and liabilities as heretofore or to complete the appropriate parts of the net worth statement... Where the department cannot obtain sufficient information by any other means, it may require a further statement which in many cases may actually be the net worth statement. This would apply for any year for which sufficient information is not available."

The guide book had two purposes. It gave the farmer a sample book "for the purpose of recording his income and expenses in such a way as to facilitate the accurate completion of his returns." It also answered questions.

RESULTS SO WONDERFUL PRICE SO ECONOMICAL

Why put up with drab dull walls, when a coat of ALABASTINE will make rooms glow with color?

Just mix with water, and see how easy and economical it is to apply. ALABASTINE brushes on easily, dries quickly without odour, and will not rub off.

Your choice of ivory, cream, buff, light buff, grey, pink, light blue, light green or white.

WORLD HAPPENINGS

BRIEFLY TOLD

The British Post Office has agreed to give permanent jobs to Braille telephonists up to the age of 60.

Property lost in London's tubes, buses and trams in 1947 numbered 281,027. Among them were 26,611 umbrellas.

Britain exported 157,343 bicycles during March—an all-time record—and 418,227 in the first three months of this year.

Mrs. Elizabeth Barker, of Chester le Street, Durham, England, 100, said her ambition was to enjoy the thrill of an air trip.

German daily newspapers have increased their size from eight to 10 pages, the North Rhine-Westphalia press association said.

Australia is endeavoring to obtain specifications for Japanese wool-combing machinery to make yarn and manufacture goods from her wool.

Princess Elizabeth received an honorary degree of Doctor of Civil Law from Oxford university and in a short speech she thanked the university officials for the honor.

Savings on deposit in Canada's chartered banks at April 30 last totaled \$3,851,000,000 against \$3,926,684,000 March 31 and \$3,774,019,000 at April 30 last year.

Dedication Of Largest Telescope In World

PALOMAR MOUNTAIN, Calif.—Largest telescope on earth was dedicated recently "to the well-being of mankind."

In ceremonies attended by heads of some of the world's greatest scientific institutions, the 200-inch star-scraper was christened the Hale telescope, honoring Dr. George Ellery Hale, "father" of the giant instrument, who died in 1938.

The telescope, with a range of 1,000,000,000 light years (the distance light will travel in 1,000,000,000 years at a speed of 186,000 miles a second) will probe into secrets of the universe. Dr. Max Mason, chairman of the observatory council, has said it may even solve the mystery of life itself.

HINT MIGHT HELP IN PATCHING SCREE

A hole in a screen where flies are apt to enter can be readily closed by fastening a patch over it. If there's no patching material at hand holding the thumb over it will do for the time being. But ladies, call at the "15" as soon as you can, and get a patch; there's always the chance that the thumb will be needed for keeping your husband under.

Charming Chair-Set

Alice Banks

Old-fashioned design for your modern home! Crochet these Colonial girls for your living room—a fresh new decoration for any chair.

Pinapple design crochet for these popular parson girls. Pattern 7057 has crochet directions.

Our improved pattern—visual with easy-to-use charts and photos, and complete directions—makes needlework easy.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to House of Arts Department, Winnipeg Newspaper Union, 275 McDermott Avenue E., Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number.

SPIDER WORKS FAST

The diadene spider has 680 tubes through which it spins its silk. It can make one cord of 680 strands together.

2781

(Photo by Peter G. Gordon)

KING FOR A DAY—Father's Day is the one day of the year Father is allowed to take it easy according to the custom established in 1910. Possibly, all fathers are not fortunate enough in having two pretty daughters and his wife serve him his breakfast in bed, Sunday June 20th, traditionally set aside as Father's Day in Canada, but in some way, in all Canadian homes... **FATHER WILL BE KING THAT DAY!**

INDUSTRIALIST TO LEAVE BRITAIN TO MAKE NEW START IN CANADA

BIRMINGHAM, Eng. — Next August J. C. Neil Gordon will relinquish his managing directorship of a Midlands manufacturing company and sail for Canada with an automobile and trailer to "start all over again."

"Some folk think I'm crazy," 44-year-old Gordon said, "but I'll bet that in a year or two I'll be a managing director again, with my own plant and a large number of Canadians on my payroll."

"But to begin with I'm willing to do anything from selling ice cream to working at a bench. And I know how to work, too. I've been through the mill once and I'll do it again..."

Starting as an employee engineer, Gordon built up a group of Midlands manufacturing companies devoted to tarpaulin, canvas, leather and sports goods (the RT group incorporating Reynolds and Company Limited). He says he is pulling out because "no enterprising trader can make any headway in Britain under the present system."

"When private enterprise is bound up with red tape it means death to private enterprise. I'm going to Canada because I believe the Canadian people still respect enterprise as the backbone of national life."

"Under a Labor Government the working people of this country have forgotten the simple truth that high wages are not enough."

Award Scholarships For Barley Study

WINNIPEG. — Five scholarships are being awarded each year by the recently organized Barley Improvement Institute as a stimulus to research for new varieties of malting barley. The scholarships will be good in any Canadian university which undertakes barley research.

The Institute, which is being financed by the brewing and malting industries of Canada, started operations here May 1. It is headed by Prof. T. J. Harrison, a widely known barley authority, who since 1939 has been assistant for Malting to the Board of Grain Commissioners for Canada.

Greatest need in the barley industry, says Prof. Harrison, is for varieties with good malting qualities and better agronomic properties. To assist in developing them, the Institute proposes to aid plant breeders at approved institutions.

The scholarships are being awarded to encourage university graduates to undertake advanced study in barley research.

Miss Canada Doesn't Like U.S. Fashions

TORONTO. — Margaret Marshall, "Miss Canada" in 1948 and runner-up in the "Miss American Beauty Contest" at Atlantic City thinks New York City is "a rich cake with too much icing on it."

The Toronto beauty queen is back home on a visit after some months' study of dramatics in New York on the scholarship she won as one of her prizes.

In her spare time Margaret is an usherette at Carnegie Hall. She's saving for the future, pointing out to us in developing them, the Institute proposes to aid plant breeders at approved institutions.

United States fashions fail to impress her.

"New York women wear too many fuzzy ruffles and frills," she said in an interview. "They go in for huge hats loaded down with fruit and flowers, very spiced heels and thick platform shoes, brilliant box coats with droopy backs and a load of jewellery... when I need anything new I will come back to Canada for it."

Pasteurized Milk Is Safe.

Agriculture Department Boost Blue Grass

OTTAWA. — The Agriculture Department plugged home-grown blue grass seed as the best for pastures, airfields, playgrounds and cemeteries.

A press release issued said that "as Canada-grown blue grass seed is better adapted than imported seed to Canadian soil and climate, it should be preferred in the interests of Canadian economy."

Two types of blue grass are grown in Canada. One, "Canada Blue Grass", is grown mainly in the Niagara Peninsula. It is best suited to dry, sandy, gravelly or shallow soils.

Canadian-grown Kentucky Blue Grass comes mainly from the Red River Valley in Manitoba.

TAX IMPOSED

England imposed a tax known as Danegeld in the 10th century to provide money for buying off the Danish invader.

"We are all resolved to make a success of our new life in Canada and my boy is prepared to earn a living in the good old-fashioned way—by work, work and more work. In Canada I hope he will develop his muscles as well as his brain."

"We are going to Toronto first. I am taking the car and trailer as a protection against the current housing shortage there."

THIS CURIOUS WORLD

Living Costs Soar In Many Lands

CHICAGO. — Living costs are soaring high over several countries besides the United States. Between August, 1939, and December, 1947, living costs in the United States rose 69 per cent. The Municipal Finance Officers Association reported.

During the same period, the Association said, the cost of living jumped 218 per cent in Iceland, 207 per cent in Peru, 205 per cent in Mexico, 178 per cent in Czechoslovakia and 72 per cent in Newfoundland.

Among countries for which comparable statistics were available, the Association added, these showed the smallest cost of living gains for the period: Canada 45 per cent, Norway and Sweden 36 per cent, and Switzerland 63 per cent.

Canadian living costs jumped the highest last year, 14.9 per cent. The United States showed a 1947 increase of 8.9 per cent. The price index declined 6.6 during 1947 in Czechoslovakia and 2.4 per cent in Norway.

WONDERFUL STOVE

Electric stove, which will cook a three-course meal in 10 seconds and to be made in Australia. Domestic units should be on the market within two years at the cost of about \$120 and bigger units for restaurants in about 12 months, for about \$250.

ENDURANCE TEST

STROUD, England. — On an "endurance and initiative test" two army cadets, aged 16 and 18, hiked 2,500 miles around England and Wales in 14½ days for 68 (\$1.24).

Health LEAGUE OF CANADA presents TOPICS OF VITAL INTEREST

SOME DON'TS FOR FOODHANDLERS

The promiscuous fingering of foods and containers is usually evident when food-poisoning outbreaks occur. Dr. A. R. B. Richmond, Toronto's Chief Food Inspector, told a gathering of Danforth district foodhandlers at a recent Health League-sponsored meeting.

He also said that much depends on the personal hygiene habits of foodhandlers, and outlined a few "don'ts" for restaurant employees—

1—Don't go on duty with a severe head cold, sore throat or any acute illness.

2—Don't cough or sneeze in your hand; use a clean handkerchief.

3—Don't report for duty if you have any skin infection or sore—consult a doctor.

4—Don't leave the toilet room without thoroughly washing your hands—keep nails trimmed and clean.

5—Don't pick at your nose, face or fingernails.

6—Don't work without hairnets, caps or bands.

7—Don't lick your fingers while working with food.

8—Don't taste food from serving or cooking spoons or forks.

9—Don't wipe your hands on uniform or apron—use a clean towel.

10—Don't work in street clothes while handling food.

11—Don't touch the rim or inside of cups and glasses—handle only by handles.

(Editor's Note—It is suggested many of Dr. Richmond's "don'ts" could well apply to those who prepare meals in private homes.)

Speaking mechanically, what the world seems to need is a few more self-starters and fewer creaks.

Minister Of Justice Announces Major Changes In Criminal Code

OTTAWA.—Major changes in Canada's criminal code were announced in the Commons by Rt. Hon. J. L. Flanagan, minister of justice.

The main changes deal with libel, culpable homicide, sex offences and manipulations on stock markets. Trials by jury, powers of magistrates, thefts from the mails and intimidation of persons by threats are also covered.

Mr. Flanagan, obtaining first reading of a bill providing for the changes, said the new legislation consists of 46 sections. Many of the changes,

however, were to correct printing errors or to clarify language.

Most of the changes, if accepted by parliament, will become effective Nov. 1. Those dealing with the changes in the powers of magistrates will not become effective until Oct. 1, 1949.

The libel section of the code is changed to provide that a person charged with conspiracy to publish a defamatory libel will be subject to trial only in the province in which he resides or in which the libel is published.

This means, for example, that a Toronto newspaper man charged with conspiracy to libel will have to be tried before Ontario courts. He will not be subject to subpoenas to such a charge in the courts of another province.

In effect, it will prevent a repetition of the recent New Liberty magazine case when two of its editors, resident in Ontario, were required to go to Edmonton to face a charge.

The change was requested, as an aftermath of that case, by The Canadian Press, the Canadian Daily Newspaper association and the Periodical Press association. The Alberta government opposed such an alteration.

Mr. Flanagan said code sections will be tightened so that courts may add indeterminate sentences to the terms of sex criminals.

Another change will be made to provide for the crime of "infanticide". A jury trying a person on a charge of murder arising out of the death of an infant will be empowered to bring in a verdict of "infanticide".

Penalty of such a conviction will be a maximum of three years.

Other changes were aimed at preventing the fraudulent manipulation of transactions on stock exchanges and at curbing security frauds.

A new section will make it an offence to intimidate any person by threats of injury to any relation of that person either in Canada or elsewhere. There have been complaints that Communists are threatening newcomers in Canada with reprisals against relatives left behind in Europe.

The bill provides for the repeal of the whole section of the code dealing with the powers of magistrates. The powers will be redefined and in some cases broadened.

London Times Would Like More Information

LONDON.—The stately Times mused for half a column on the report that Mrs. Florence C. Dunmore, Pa., said down a banner before breakfast on her recent 101st birthday.

It is difficult to resist the feeling we have been told either too much or too little about how she spent her birthday, the editorial said.

We have no vestige of right to assume she spent the rest of the day in a rocking chair; she is far more likely to have been crouched over the controls of a helicopter, and if she was we ought to have been told about it.

We do not even know whether she adopted the forward seat or whether she slid aside or side-astride. These points are of more than academic importance to devotees of this extraordinary sport.

"On the whole, banister-sliding is a lost accomplishment, and it is sad to think of the vast majority of the younger generation of this country growing up with none of that basic early training in the sport which is so essential if you intend to adopt this means of progression on your 101st birthday."

GEMS OF THOUGHT

ELEMENTS OF SUCCESS

Man cannot be satisfied with mere success. He is concerned with the terms upon which success comes to him.—Charles A. Bennett.

A man's true estate of power and riches is to be in himself; not in his dwelling, or position, or external relations, but in his own essential character.—H. W. Beecher.

The most important thing for a young man is to establish a credit—a reputation character.—John D. Rockefeller.

What men want is not talent, it is purpose; in other words, not the power to achieve, but will to labor.—Bulwer-Lytton.

I believe the true road to pre-eminence in any line is to make yourself master of that line.—Andrew Carnegie.

The devotion of thought to an honest achievement makes the achievement possible.—Mary Baker Eddy.

BEE'S SIGHT PECULIAR

Bees probably see red, yellow and green as a single color, according to the Encyclopedia Britannica. On the other hand, bees apparently can see ultra-violet light that is imperceptible to the human eye, as well as blue-green, blue, and violet.

THOUSANDS GATHERED FOR PLANE—Anti-toxin serum being flown across Canada to relieve suffering of B.C. food victims is seen being handed aboard T.C.A. North Star skyliner at Malton airport in Toronto. The merry flight was the aircraft's inaugural trip.

City Of Detroit Experiences Mock Blitz Staged By Superfortresses

DETROIT.—The industrial might of the nation's auto production centre lay in mock ruin from a blitz bombing attack staged recently by 200 Superfortresses of the Strategic Air Command.

An alert but outnumbered defence force of 40 jet fighters led by wartime ace Lt. Col. David C. Schilling was unable to prevent the bombers, escorted by 150 fighters, from reaching their targets.

The bombers could have torn Detroit to bits if they had been carrying bombs, an Air Force observer at Selfridge Field said. "The theoretical bomb load of the attacking fleet was over 1,000 tons of high explosive."

Haze prevented those on the ground from seeing the aerial action, but the roar of engines from the nearly 400 planes could be heard distinctly. The Superfortresses were their run at 23,000 feet.

The fleet of B-29's assembled over Kansas City for the mock attack, which was described as a routine training mission in formation flying. Selfridge Field defence forces, which had not been warned previously of the attack, were mobilized swiftly when the air raid warning network sounded the alarm.

Lt. Col. Schilling, who has a German record of shooting down 24 German

Seeds Act Gives Policy On Seeds

Many people may be confused by the terms The Seeds Act and The Seed Regulations since both are part of the law respecting the sale, production and distribution of seed in Canada.

The Seeds Act is one of the statutes of Canada and was passed by the Dominion Parliament in 1937. It contains the long term policy laid down in regard to seed. It provides that seed must be labelled when it is offered for sale, that seed inspectors and seed analysts may be appointed, that new varieties must be licensed, that seed must be sold as represented, that "rejected" seed may not be sold, that seed imported into Canada must meet Canadian standards. The Act provides for enforcement of the law.

In addition to these provisions there is a section which authorizes the Minister of Agriculture to make regulations. The Act itself, since it contains general policies, is only changed at intervals of years; but conditions under which seed is produced, processed and sold change with the seasons. Varieties, production methods, processing methods and merchandising are continually changing, and improving. Therefore, changing conditions are met by changing the regulations but the changes in the regulations do not affect the basic principles of the Act.

As the Act prescribes and limits the regulations which can be made, when they are signed by the Minister, they become just as much a part of the law as the Act itself.

Car Licence Must Remain In Original Owner's Possession

WINNIPEG.—Manitoba car owners can no longer swing a deal on the fly, changing in the process, or slightly used licence plate to seal the bargain.

From now on, a new provision in the province's highway traffic act ensures that the licence plate must remain with the original owner as long as he possesses a motor vehicle, R. B. Baillie, registrar of motor vehicles, has announced.

The car's new owner, unless he already has a plate of his own, must purchase a new one from the motor vehicle licence department.

The original owner, if he does not want to put his plate on another car, may return it, with the registration card, to the department and receive a refund amounting to 50 per cent of the motor vehicle licence fee, Mr. Baillie states.

In order to get his refund the man who sold his car must show proof that the vehicle has been re-registered in the province of Manitoba, according to the new regulation.

If the car is getting another car, however, he may transfer the registration to it.

"From the standpoint of the public, the police, and the motor vehicle licence department," the registrar states, "the policy of having the plate stay with the car owner has proven most satisfactory elsewhere."

Helpful Hints

A drop or two of lemon juice will make cream whip.

If something is burned in the oven, sprinkle a bit of salt in the oven to disperse the burnt odor.

To sweeten bottles or jars, put a bit of dry mustard in them, half fill with water and let stand. Then wash.

If the leaves of books become damp sprinkle cornstarch between them. This will dry them and prevent mildewing.

The temperature of the sun on its surface has been estimated at about 10,000 degrees Fahrenheit.

THE SPORT WORLD

Back in 1943 only 3,773 harness horses were campaigning on the North American continent. This year over 9,000 are trotting and pacing to pay the feed bills.

More than 2,000 newspapermen and 200 radio announcers, who will tell the story in 43 languages, have been assigned to cover the Olympic games in London this summer.

Montreal—Canadian football's big four are a-trotting again and this time it's Hamilton Wildcats who are about to abandon Sunday games. Inasmuch as Sunday games are played only in Montreal, Elmer (Montreal Herald) Ferguson feels that the Alouettes will be taking a kick in the pocketbook.

Archie McKinnon, coach of the Victoria, B.C., Y.M.C.A. swimming team, has been appointed Canadian Olympic swimmer coach. His nomination of the appointment was received from R. E. Collins of Winnipeg, secretary of the C.A.S.A. It will be McKinnon's second trip to the Olympics in an official capacity. In 1936 he was Canadian track and field coach.

A letter from a student in the United States was received in Galt, Ont., offering the lady services for a tryout with a senior baseball club. This is all he wanted: Four hundred dollars for signing; \$50 fare; a \$40-a-week job; his room and board; a percentage of the gate receipts; and a bonus if the team should get into the playoffs. Said one observer: "His letter should be forwarded to the New York Yankees."

St. Andrews, Scotland.—Players can stop play in case of threatened danger from lightning under a new rule of golf proposed by the Royal and Ancient Golf Club of St. Andrews. It was included in a draft of new rules of golf which is being submitted to members of the club's representative golfing bodies in this country and overseas. A final draft will be voted on at a September meeting of the R. and A. The stytle rule is retained.

Tractor Impounded In Highway Crash

WINNIPEG.—For the farmer who owns it, a tractor may be a farm implement; but when it travels on the highways at more than 10 miles an hour, it becomes a motor vehicle, under the terms of the Manitoba Highway Traffic Act. As such, it is subject to the Safety-Responsibility law of the highways and if its operator can't produce evidence of financial responsibility, his tractor may be impounded.

A Manitoba farmer found out all this when his tractor collided with another motor vehicle. For one dollar he could have registered his tractor as a motor vehicle. For another \$5 he could have taken out an insurance policy and received protection from the insurance company with standard limits of \$5,000 and \$10,000 for public liability and \$1,000 for property damage.

He had not done this, however, and because he was unable to produce proof of financial responsibility, his tractor was temporarily impounded. He had to put up \$450 to get it out of pound, as a guarantee to take care of any claim the owner of the car might have against him for damages. He then had to furnish proof of financial responsibility by filing a certificate from an insurance company.

He faces a claim from the owner of the damaged car. If the courts find him responsible for the accident, and he is being charged in police court with neglect to register a tractor as a motor vehicle. This is the first time a tractor has been impounded since the Safety-Responsibility law came into effect in December, 1945.—Financial Post.

BLAME POLICE FOR RUINING BUSINESS

CHUNGKING.—A police drive ruined business for pickpockets. So 150 of them showed up at police headquarters and demanded food and clothing because police interference had robbed them of a means of making a living.

The cops told them to beat it. They did, vowing to return to their trade, and adding they would break no police interference in the future.

WINNIPEG TAKES ACTION

WINNIPEG.—City council has passed a law prohibiting use of firearms, air guns, spring guns, catapults, sling shots, bows and arrows, and other such weapons within city limits. Use of these weapons by juveniles created a nuisance, and in some cases a menace.

Smile of the Week—

The father of the household was becoming impatient at the lateness of the hour, when he said: "I can't see why that young twerp calling on Sophia hasn't enough sense to go home. It's past midnight!" The inevitable little brother spoke up and said: "He can't go, father; sister's sitting on him."

Pasteurized Milk Is Safe

BARBARA ANN SIGNS CONTRACT WITH M.C.A.—Canada's queen of the ice, Barbara Ann Scott, has signed a professional contract with the Music Corporation of America, one of the world's greatest booking agencies, which becomes the sole agent for her services. The management of M.C.A. became necessary because of the great number of offers which continued to come from Hollywood. So far Miss Scott has been guaranteed no set amount of money by the Music Corporation, but many of the major studios have already offered her attractive figures. M.C.A. will take a cut of 10 per cent from Barbara's future earnings for the duration of the contract. Her talents have also been available to a charitable organization, which is to promote the welfare of crippled and underprivileged children. Above Scott's sweater is seen a medal she won at the 1948 Winter Olympics, awarded annually to the country's outstanding athlete. She won it for the second time this year, making her the only two-time winner.

Saves Six Years' Work

Government Using Helicopter To Survey Canada's Wilderness

OTTAWA. — Something new is being added to the Mines and Technical Surveys Department's technique of wilderness mapping—use of the helicopter on geodetic and topographical surveys this spring deep in the Yukon and along the Alaska Highway.

With the "flying windmill," disclosed by W. B. Timm, director of the Department's Mines and Geology Branch, a topographical survey crew of nine will map a 60-mile wide strip of wilderness across the Yukon north of Mayo.

Ordinarily, it would take from six to nine years for ground parties with pack mules struggling through swamp and brush to put up mountains to cover these same estimated 15,000 square miles.

A second party, on the geodetic survey will make equally quick work of mapping both sides of the Alaska Highway for a distance of some 100 to 150 miles between Teslin and Watson Lake.

The survey parties left Ottawa by air, the topographical crew to fly in from Edmonton to the Yukon, and the geodetic group to roll north along

the Alaska Highway aboard a 10-ton truck.

For the Alaska Highway crew, the big truck will serve as a base, and haul the helicopter from point to point over the long gravel road.

The helicopter for the topographical party is being taken north by coastal steamer from Vancouver to Skagway, then to proceed inland under its own power.

Topographical work routinely follows the geodetic survey, filling in with all the minute mapping details the basic triangulation.

With the "flying egg-beater," the topographical men instead of having to sweat and swear their way up wilderness hills-tops on foot, will hop to heights of land in comparative comfort.

The topographical party in charge of H. N. Spence, includes two field engineers, two college students, a cook and helper, the pilot and three mechanics.

The geodetic party which will fly in 25 miles on either side of the Alaska Highway instead of having to plug it by foot, numbers 26 men and is in charge of F. P. Steers. His helicopter went north by rail to Dawson Creek and finishes the ride up the highway on the big truck.

Both Mr. Spence and Mr. Steers are from the Ottawa head offices of Mines and Resources.

"The helicopter survey is a 'first' for the department," said Director Timm, "and while strictly speaking, an experiment, we expect big things from it in time saved and space covered."

Chicago Mail Order House Has New Idea

CHICAGO.—Smells sell—so a Chicago mail order house is considering odorizing its merchandise to boost sales.

Robert D. Steckler, vice-president and merchandise manager of Spiegel, the mail order house puts it this way: "Smell is a natural selling aid. Recent tests have shown that women will pick up one pair of hose rather than another when one has a pleasant scent. Questioned, they do not realize why they made the choice."

"Broad wrapped in wax paper smelling of cedar leaves sent sales soaring in another case."

The simplest method of cleaning your stainless steelware is to wet the metal, sprinkle salt all over it, then rub with a cloth dampened in vinegar. The coloration will vanish. For higher sheen wash the article in soap and water and polish, after the salt and vinegar treatment.

THEIR letters and diaries, and some of their descendants, tell of a policeman's life then.

Early officers disagreed that Edmonton ever would be a city—they said the river banks were too high for the expected railroad to cross.

Settling on Fort Saskatchewan, 20 miles downstream, they dropped Edmonton. Canada's last-known half-breed was hanged at Fort Saskatchewan in 1882—an Indian whose last complaint was an enigmatic remark that his mother-in-law had been a bit tough.

A rich old lady was paying her nephew's way through university.

She told a visitor one day that she received identical reports from her nephew and noted that the languages were rather expensive. She showed her visitor the latest report. It read: French, \$10.95; Latin, \$15.50; Scotch, \$76.80.

CONQUER GERMS

Germ of athlete's foot and various other fungi and parasitic yeasts which cause disease in man and animals were knocked out with formalin, a new addition to the family of antibiotics made by pressing juice from leaves and stems of the tomato plant, says a study's medical research discovered.

New issues ... Israel, has issued stamps showing ancient Jewish coins, symbols and inscriptions ... St. Marino has issued a stamp for Labor Day ... Russia is issuing stamps to painter Ivan Shishkin, dramatist Alexander Ostrovsky, and philosopher Vladimir Belinsky, on anniversaries of their deaths ... Czechoslovakia has issued a stamp to the Prague Agricultural Exhibition ... Guatemala has issued four stamps to the new Labor Code ... Poland has issued new airmail stamps ... Argentina has issued a stamp for the American Indian.

Ed. Note.—If you have any old Canadian, Newfoundland or British North American stamps for sale or exchange write to our Advertising director, Mr. Frank Kuhn, 120 Wellington St. W., Toronto 1, Ont., who is an amateur collector.

Who's Who on Stamps ... On a Cuban 1929 stamp Niagara Falls is shown along with a portrait of Jose Maria Heredia y Campuzano. The stamp was issued on the centenary of his death, although a decade ago for the border region of the Gran Chaco jungle area brought rival map stamps from both countries, and map of final arbitrated boundary was issued by Paraguay in 1939 on an airmail set.

Who's Who on Stamps ... In 1944, with interest in the Antarctic area reviving, Great Britain overprinted Falkland Islands stamps for four dependencies of the colony. These were Graham Land, South Georgia, South Orkney and South Shetlands. In 1946 a new map stamp was issued for the Falkland Islands Dependencies, showing the location

Plenty O'Veiling And Plenty O'Charm Mark Hat Styles

Matching maline veiling swatches Florence Reichman's toast straw braided bonnet, topped with one pink rose and tied on with long green velvet ribbon, feminine, and pretty. Perfect for summer wear with shantung muslin or black velvet. Mercury wings are bound in black velvet.

Cut From Eighty-Eight Days To Seven Hours

Mounties Travel By Air Instead Of On Foot

EDMONTON. — In scarlet tunics and gold-striped trousers, afoot because their horses had given out, 20 members of a new police force reached Fort Edmonton 74 years ago after an 88-day march from Dufferin Barracks in Manitoba.

They were the first "Mounties"—members of the Royal Northwest Mounted Police.

Forty-two musician-bears to their tradition—members of the Royal Canadian Mounted Police band—recently covered twice that distance in seven hours.

Flying to Edmonton to inaugurate a cross-country concert tour, the band, under Inspector J. T. Brown, left Ottawa at 10:45 a.m., reaching the provincial capital at 6:45 p.m. that evening.

Their recruiting serenades to praise the youth—such was the purpose of the tour—is a far cry from the succession of bugle calls that daily charmed the early Mounties' days in a routine of frontier policeman's duties.

Their letters and diaries, and some of their descendants, tell of a policeman's life then.

Early officers disagreed that Edmonton ever would be a city—they said the river banks were too high for the expected railroad to cross.

Settling on Fort Saskatchewan, 20 miles downstream, they dropped Edmonton. Canada's last-known half-breed was hanged at Fort Saskatchewan in 1882—an Indian whose last complaint was an enigmatic remark that his mother-in-law had been a bit tough.

A rich old lady was paying her nephew's way through university.

YOU'RE TELLING ME By WILLIAM RITT Central Press Canadian Writer

Gold bars with a total value of \$750,000 were found in a Siamese sewer. Those who found the treasure probably don't mind being called filthy rich.

Ignorance, says a noted medico, causes more malnutrition than poverty. A devilish lot is caused by lack of food.

Flouting previously established theories, a Miami, Fla., astronomer claims the moon does not revolve on its axis. Maybe not, but it has brought a lot of people's lives to a turning point.

People who eat rapidly, says a psycho, have a sense of guilt. Guilt of what?—of eating rapidly?

Objection to the proposed three-dollar bill is based on the contention that it isn't needed. We wouldn't know about that generally, but this department needs all it can get.

There is agitation to have a two-and-a-half-cent coin minted. Why? All it could buy would be two and one-half penny postage stamps.

A Californian, we read, can operate a typewriter with his feet. Comes in handy, no doubt, when he has to take dictation over the telephone.

Spelling Bee

The results of the U.S. national spelling bee inspired Ed Crough of the Associated Press to turn out the following:

The nashinal speling bee is over and the young woman that one it deserves all the congratulations she got.

Why, sum of the winds they through at that poor little 14-year-old girl from Black Horse, Ohio, would have stumped a grown man.

But she whized right threw them, did this kewt little too-head named Jean Chappeler—whopping big words like impeckable and persikewity and it—p!

Well, lots of big words anyway. She noked out the runner-up, a lovie boy named Darrell Flaville, with a sixteen-dollar speel word. Oligarchy.

(That's what it sped on the official list anyway. Doubtless a misprint for "oligarchy.")

So the winner got \$500 and a trip to New York and the runner-up, whose sponsor was the Washington Daley News, got \$300 and a ride.

And being only 14, he seemed to like the \$500 better. In fact he screwed his face all up like Mikky Rummy and he wrigled like a worm on a hook when Jean—she's the girl who won—gave him a grate big smack for consolation purposes.

The contest was in the Nashinal Press Klub Bldg. It was an inspiration to many of the finalists who frequent the bldg. They too remember their early struggles with spelling. It is only by such devices as the Nashinal Spelling Bee that the young scholars of today will become the expert authors who will rite yur newspapers tomorrow.

More Care Handling Eggs In Summer

Fresh eggs being a perishable commodity, must be carefully handled if the poultryman is to receive the best returns when he markets the eggs. Care is required in spring, warm summer temperatures and rough handling all tend to lower the quality of eggs and consequently, the returns to the producer.

If hens are allowed out in muddy yards, and nests and floors are not kept clean, too many soiled eggs result. Such eggs spoil rapidly because of the moulds and bacteria carried in the dirt. A similar condition arises from breakages in the nests, and for this reason, it is desirable to provide a sufficient number of nests and to collect the eggs frequently, especially during the morning when most of the hens do their laying. Soiled eggs should not be washed; it is preferable to rub any dirt off with steel wool.

Male birds should be separated from the laying flock, as the warm summer temperatures will cause the germ of a fertile egg to develop. Warmth has the additional effect of lowering the cooking qualities of the eggs, consequently they should be stored at a cool temperature, about 60 to 65 degrees F., in a well-ventilated room and free from strong odours. A farm cellar is often particularly suitable for this purpose.

Even with these precautions, eggs should be marketed frequently to avoid deterioration. Care is required during transportation, as rough handling and bumping in a truck may cause the mixing of the yolk with the egg white.

Clean, fresh water and good feeding practices, using well-balanced rations, are important factors in the production of quality eggs.

Plenty Of Reading Can Help Teen-Agers To Talk Easily

The teen-ager whose lack of ease with people is due to the fact that she can never think of anything to say should stock up her mind with conversational material.

If a girl reads newspapers, magazines and books, she is bound to have subjects on tap about which she can talk. To read with the idea of turning the material into conversational topics is not a bad idea for the timid talker.

Is that your problem? If so, try stocking up your mind so as to be ready for the challenge of holding your own with a group of talkers.

Knowing that you have something to say will give you the courage it takes to sail into a conversation. When you really have something to say, people will be inclined to listen with interest. That is all the encouragement any person needs—even a timid person.

While you are busy informing yourself, take the trouble to get your facts straight. The risk that you take, if you don't, is contradiction from the people with whom you are annoyed by misstatements of fact. There are few situations more embarrassing to a timid talker than that of being contradicted or argued down by some person with a superior knowledge of the facts.

Apologetic Attitude Thief Of Charm

An apologetic attitude is one sneak thief of charm against which a mature woman who values her poise should be especially on guard.

By this I don't mean the social apologies which she must make when she is guilty of rudeness or an unintentional slight. I mean those unnecessary apologies about her appearance, her surroundings, her job and so forth.

Such apologies indicate a lack of self-confidence and may serve only to point up shortcomings.

Unexpected callers, for example, will throw many women into a flurry of apologies for their uncombed hair, the mussed-up house or lack of "party" food to serve with tea. It is more poised to greet an unexpected guest calmly and to concentrate on making her feel at ease than to involve oneself in endless personal apologies which may make the visitor feel like an unwelcome intruder.

If the hostess is worried about her appearance, she may excuse herself from the room while she runs a comb through her hair and slips into a fresher dress.

AIRED SHIPS AT SEA

LONDON. — Britain's post office radio stations dealt with 322 distress calls during 1947. In addition, 323 medical messages were handled under a service called Medical Advice to ships at sea.

ON THE SIDE —By E. V. Burling

She is a winsome wee thing, She is a handsome wee thing, She is a bonnie wee thing, This sweet wee wife of mine.

The world's wreck, we share of it, The worry and the care of it, With her I'll blithely bide my fate, And think my joy divine.

Students at the bride's cooking school, Manhattan, are taught, among other things, how to cook a "How to hold a husband dinner." That is a nice thing for a young woman to know. Of course, good cooking alone will not hold a husband, but it helps a little. It is fifth in the order of importance of things that keep husbands happy, according to the research of our Mules & Men experts.

OPPORTUNITY KNOCKS

Wanted—private secretary (24 to 27 yrs. old) to president of corporation. Five or six months in Boston. Balance of year in Miami Beach, Fla. "Must be able to cope with every situation that might arise." That is an advertisement noted in a New York newspaper. Sounds like nice work for the girl who gets it. Of course a lot depends upon what "situations" are likely to arise. Honey blenders and red-heads are the most decorative secretaries, but the best "situation copers" are the brunettes.

SIDEGLITS

One of the smartest youngsters in the Hollywood film colony is Dorothy Lamour's 21-year-old son, Ridge. He will not let his mother kiss him if she has lipstick on ... Note it reported a Los Angeles man had a record of 100 arrests for drunkenness. That old boy's love of liquor certainly cost the taxpayers plenty of money. In some Scandinavian countries when a man is arrested six times for drunkenness, he is ordered sent to a nautarium to take the cure.

HORSES & WOMEN

Note it stated that the new style of feminine headgear will call for "hat or no hat." Be that as it may, I still claim that when a female wears her little or no hat it makes her look ten years older and 1,000 more cent. dumber. Take your wife's hat and put it there on her head and you will see what I mean. It is about time husbands began protecting their wives against themselves in the matter of ridiculous styles.

PLEASE NOTE

"Jumbo shrimp cocktail, a one pound sirloin steak, baked Idaho potato, home-made apple pie, coffee and rolls." That is a meal I note offered for \$2.25 in Manhattan. What can you duplicate it for in your vicinity. Remember the steak must weigh one pound.

HOTELS

To break even a large city hotel must have 85 per cent. of its rooms occupied. Some of the hostesses, not having the required 85 per cent. occupancy, seem to be trying to break even by cutting the liquor sold in their bars and reducing the portions of food in their restaurants. The hotel that is anywhere near as good as it used to be is a distinct rarity these days.

REPEATING NAME

Subscriber named Stephens states she wanted her son to be eligible for the Repeating Name club, so she named him Stephen. "The Stephens Stephens." This is all right for her. But I hope Hyacinth Fink doesn't get the same idea and name a son Funk Fink.

: STAMP CORNER :

By JAMES MONTAGNES

New issues recently arrived in Canada include (top left to right) French philatelia featuring the Luxembourg Palace at Paris and the town of Conques, China's high value stamp showing a theatre on the island of Formosa, and (below, left and right) Finland's new Red Cross stamps featuring Finnish authors. Cuba has new airmail stamp to the anniversary of the war of 1895 (lower centre).

Maps shown on stamps are often issued as claims for a country's territory. Map stamps have caused international conflicts and bad feeling have made front page news in recent years.

Most recent of the controversial map stamps were issued about a year ago by Chile, which issued maps of the South Pole, segments of the region to which Chile claimed sovereignty.

Neighboring Argentina has also issued a map stamp which caused difficulties with Great Britain. Argentina's 1936 map stamp showed the Falkland Islands as Argentine territory. Great Britain, which has issued stamps for these islands for many years, objected, and Argentina in 1937 issued a new stamp without coloring the Falkland Islands as Argentinean property.

In 1944, with interest in the Antarctic area reviving, Great Britain overprinted Falkland Islands stamps for four dependencies of the colony. These were Graham Land, South Georgia, South Orkney and South Shetlands. In 1946 a new map stamp was issued for the Falkland Islands Dependencies, showing the location

of the islands in relation to the South Pole.

There have also been from time to time border clashes between Haiti and the Dominican Republic which occupy a large island in the West Indies. The Dominican Republic issued a set of map stamps showing demarcation lines between the two small republics. Honduras has claimed territory of British Honduras in recent years, and issued map stamps in 1935 and 1943 showing location of the Central American republic and its neighbors. The long war between Bolivia and Paraguay a decade ago for the border region of the Gran Chaco jungle area brought rival map stamps from both countries, and map of final arbitrated boundary was issued by Paraguay in 1939 on an airmail set.

Who's Who on Stamps ... On a Cuban 1929 stamp Niagara Falls is shown along with a portrait of Jose Maria Heredia y Campuzano. The stamp was issued on the centenary of his death, although a decade ago for the border region of the Gran Chaco jungle area brought rival map stamps from both countries, and map of final arbitrated boundary was issued by Paraguay in 1939 on an airmail set.

SCENES OF BRITISH COLUMBIA'S WORST FLOOD

The above scene in the Fraser valley shows the main C.N.R. lines being undermined by flood waters boiling up between the ties. Health officials endeavored to inoculate all persons coming to and from the flood areas against danger of typhoid fever.

Flood-stranded cattle were herded down inundated farm roads at Laidlaw, B.C., their course was marked only by tops of fence posts. Food shortage forced many farmers to shoot their cattle. Small trees in background are almost covered.

The vast farmland area nestled at the base of the Rocky Mountain chain presented desolate scenes like this one near Agassiz, a ghost town after mass evacuation of residents by the navy. Rapid melting of snow in the mountains sent new cascades of water into swollen rivers.

YO, HO... MR. RIFLEY!—Here is one for the medical books. Twin infant sisters were born five days (114 hours) apart. They are having their first meal after being released from a hospital at Cheyenne, Wyo. Sharon, at right, is being fed by her mother, Mrs. Jack Ross. She was born April 30 and weighed six pounds, one ounce. Karen, left, with an aunt, was born May 5 and weighed four pounds, one ounce.

ISRAELI PRESIDENT WITH TRUMAN—Provisional president of the new State of Israel, Dr. Chaim Weizmann, (right), presents President Truman with a "Torah" after a half-hour conference at the White House, in Washington. The "Torah" contains the first five books of the Old Testament. The famed chemist would not discuss the nature of his talk with the chief executive.

ONTARIO PILOT, 50, KILLED—Horace William "Jimmy" Westaway, 50, pilot for the Ontario Air Services for almost a quarter century, died in the cabin of his government plane when it crashed in the Severn river near Orillia, Ont., during a take-off. W. S. Taylor, a mechanic, received a shoulder injury and Henry Crowell, a ranger, was not hurt. Officials said the plane was on a routine check-up flight when it crashed near the power plant. They believe it struck an object in the river and nosed over. A short, quiet man, Westaway, formerly of Simcoe, Ont., was a veteran of the First World War. He flew in the Middle East during the 1920's and saw active service during the Second World War, having obtained leave of absence from the department of lands and forests. Above he is pictured filing nickels from the propeller of the plane which crashed.

P.C. ROBERT EDGINGTON ERNEST CLARK HOPKINS—POLICE BULLET KILLS SUSPECT—Shot in a police chase, Ernest Clark Hopkins, 32, failed to survive an emergency operation to remove the slug from his abdomen. Hopkins, police said, was one of two men chased by Constable Robert Edginton after he surprised them at a Toronto restaurant. He was hit by the third shot fired by the constable who, police said, was losing the foot chase after he had run about three blocks. Police said they found almost \$200 in cash and four cigarette lighters in Hopkins' possession. The money has been identified by the owner of the restaurant, Harry Louis.

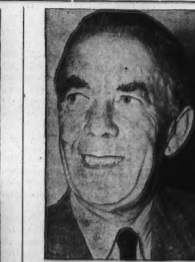

HUNDREDS BATTLED BLAZE RACING THROUGH 100,000 ACRES OF FOREST—Weary and smoke-be-grimed firefighters take time out for a quick bite in the Northern Ontario bush before returning to the losing battle against one of the two major fires which swept nearly 100,000 acres of tinder-dry forest. Blazes in the Mississagi and Chapleau areas raged uncontrolled in high wind, causing the largest fire in northern Ontario's history.

VETERAN DROWNS—Virgil Heera, of Point Anne, Ont., was one of two veterans drowned when their flat-bottomed fishing boat overturned off Point Anne in the Bay of Quinte. The boat and cars were found the morning after the tragedy. The other victim was Rodwell Parsons, 21. Both men left English war wives.

BURNED BY HOT TAR—Jimmie MacFarlane, seven, Toronto, who was burned by hot tar when a tar pot near which he was playing tipped and fell over. "He was so shocked he didn't know his way home," said his grandmother, Mrs. J. Ross.

PALESTINE MEDIATOR—Count Folke Bernadotte, president of the Swedish Red Cross and nephew of King Gustaf V, was named United Nations mediator for Palestine at Lake Success, N.Y. As agent of the security council, he will serve as a neutral figure to whom Jews and Arabs can turn when they are ready to negotiate peace.

OUR COMPLETE SHORT STORY—

MISTAKEN IDENTITY

By TED KIMBALL

Lenny stared into the washroom mirror. Behind him, the stranger also stared. They looked at each other for a long time, each waiting for a long time, each waiting to speak. Then Lenny turned slowly around.

"I never saw anything like it," he said.

The stranger had come into the washroom breathless, worried, glancing apprehensively over his shoulder. Now he had control of himself again. He was snappy and smiling and at ease.

"It's amazing," he admitted.

"We could be twins," Lenny said. The stranger nodded. "My own mother couldn't tell us apart," he reached into his pocket. "I guess we'd better have a cigarette on it."

Lenny accepted a cigarette and supplied the light. They stood smoking and regarding each other in amazement.

"I wouldn't have believed it," Lenny said. "Just like two pins."

"You'd fog my own mother," the stranger repeated. Lenny saw that he was still a little nervous. The fingers holding the cigarette trembled almost imperceptibly.

There didn't seem to be much more to say. Lenny glanced toward the door. The stranger held out his hand.

"Just a minute. I was noticing that suit you have on. I like it."

"Do you?" Lenny was surprised. He had bought the suit for fifteen dollars, second-hand. He wasn't very proud of it.

"I've been trying to get one just that color," the stranger said. "My wife says I should get all my suits that color."

Lenny waited. The stranger was well dressed, in a light coat of some expensive material. Lenny guessed that it would have cost him around a hundred dollars.

"You wouldn't want to trade, would you?" the stranger asked.

Lenny thought it over and couldn't see any reason not to. It wasn't a fair exchange, but he wasn't the one who was getting stung.

"If you want," he said. "I don't care."

The stranger was already peeling off his coat. "Lucky we bumped into each other," he said. "Not often a trade makes both sides happy."

They completed the exchange in silence, finally transferring the contents of their pockets. Lenny buttoned his new coat and looked at himself in the mirror.

"How do you like it?" the stranger asked.

Lenny said, "Fine. Fits like a glove."

"Me, too. Everybody's happy, then. Shake!"

Lenny said, "Sure." They shook hands. He nodded toward the door.

"Coming?"

The stranger said, "No. You go ahead. I want to wash up a bit."

"Right," Lenny opened the door and walked out into the hotel lobby.

A small, dark man with shifty eyes set close together in a weasel face was leaning nonchalantly against a pillar. When he saw Lenny he tossed away the butt of a cigar and came forward. He blocked Lenny's path across the lobby.

"Okay, Weaver," he said in a flat, bored voice. "I want my fifty bucks."

Lenny stared at him.

"What fifty bucks?"

"You know what fifty bucks, Weaver. I been taling you. I saw you go in that washroom. Now I want my dough."

Lenny had expected something like this to happen. He wasn't surprised. "My name's not Weaver," he said. "The small man laughed without humor."

"Quit kidding," he sneered, "and quit stalling. I want my dough and I mean to get it." He had his right hand in his pocket and there was something in the hand, something bulky.

Lenny shrugged. He reached into his own pocket and brought out a roll of bills. He stripped off five tens and handed them to the small man.

The man took the money. "Next time I don't want to have to come after it," he said.

Lenny nodded. "Okay." He watched the small man leave the hotel, and then he crossed the lobby and stood behind a pillar.

After a while the stranger came out of the washroom, wearing Lenny's fifteen-dollar suit. He looked carefully around the lobby and a wide grin came over his face. He lit a cigarette and strolled jauntily toward the doors.

Before he reached them, two men wearing derbies and smoking cigars—detectives—fell in beside him and grabbed his arms.

"There was a brief struggle. The stranger protested in angry bewilderment."

Lenny didn't wait to hear what he was saying. He could guess that instead he turned and left the hotel quickly by a side door.

SIZES 34-48

Sew-Easy Two-Piecer

By ANNE ADAMS

This costs so little in time, money and effort! No shoulder seams, pattern pieces at a minimum—so neat, trim, slimming! Pattern 4878 is smartly suited for now and summer!

This pattern, easy to use, simple to sew, is tested for fit. Includes complete illustrated instructions.

Pattern 4878 comes in sizes 34, 36, 38, 40, 42, 44, 46, 48. Size 36 takes 4½ yards 35-inch fabric.

Send twenty-five cents (25c) in coins (stamps cannot be accepted) for this pattern. Write plainly size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

UNDER GOVERNMENT CONTROL

CANORA, Sask. — The village of Stenen about 18 miles north of Canora was put under government control when the department of municipal affairs appointed H. Nauariak, village secretary, as business manager for the village. The matter was started when the village council broke up on the decision of having a vote taken to join the Canora union hospital district.

MADE IN AUSTRALIA

SYDNEY, Australia. — First samples of Australian-made stainless steel table knives were received by the Australian retail trade recently. Australia has previously relied upon imported stainless steel from Sheffield, England.

3781

CHAMPION STEER—Inset—Champion steer in the carcass class at Saskatoon Fat Stock Show was at Saskatoon was owned by Eddie Lang of the Crank Baby Beef Club (at the halter).

Western Briefs

EDMONTON. — City council approved sale of seven city-owned lots for \$150,000, the preliminary step in plans of a Montreal company to build a 15-storey, \$6,000,000 hotel in downtown Edmonton.

MOOSE JAW, Sask. — Opposition to amusement of a "vulgar nature" provided at provincial exhibitions and country fairs was registered at the Saskatchewan conference of the United Church. Appreciation of work done among boys and girls to stimulate their interest in agricultural and industrial life of the nation was expressed. But "deep regret" was affirmed that amusements at many fairs have come to be the main attraction.

BANFF, Alta. — John Norison Finlayson of Vancouver was installed as President of the Engineering Institute of Canada, at the 62nd annual convention at the Banff Springs Hotel. He succeeds L. F. Grant of Woodstock, Ont.

Flood control remained one of the key problems facing the engineers at the closing sessions.

MORDEN, Man. — Another step has been taken in the provision of a water and sewage system for Morden as the result of negotiations members of the town council have had with the Manitoba Public Utility board.

A bylaw will be prepared by the council, submitted to the board and if it meets with the approval of the latter body a vote in the local improvement area will be taken.

EDMONTON. — A record year for Alberta business was forecast by Hon. J. L. Robinson, industries and labor minister for the province. The cabinet minister released figures showing that except for coal and some receipts, all Alberta production during the first two months of 1948 was higher than for the same period in 1947.

Fly Two Million Bees To Alberta

EDMONTON. — First large commercial shipment of bees to Alberta by air brought two million of them in 200 packages from Davis, Calif., bound for the Frontier Honey Co., Westlock.

W. C. LeMaistre, provincial apiarist, commented: "The bees were in excellent condition; this venture was so successful that shipment by air probably will become a common thing." Smaller shipments have been made before.

Clyde Gault, manager of the Frontier Honey Co., said he had delayed ordering because of the late spring. Then as spring advanced rapidly, he decided to ship the bees by air to save time.

Test Anti-Mud Slide Discovery At Calgary

CALGARY.—First Canadian application of a system of electromos to prevent mud slides—a German wartime discovery—was carried out on a steep hill threatening more than a score of Calgary homes.

The experiment, which involved forcing of drainage by using an electric current, started on a 90-foot ridge on Sunnyside Hill here.

A mudslide on the hill, situated on the north bank of the Bow River, forced 63 persons to flee from their homes recently. A number of dwellings suffered minor damage and a garage was demolished.

Electromos involves the drawing out of moisture from the hillside and forming a dry barrier across the bow of the hill. Direct current is forced into the ground through a number of electrodes.

Officials in charge of the experiment hope that the semi-dry barrier along the face of the hill will prevent crumbling of the edge. The process was discovered by a German scientist now living in England. It was first used in constructing the German submarine pens at Trondheim, Norway.

The process requires a direct current to the electrodes which are fixed in water pipes set vertically in the ground. The current draws the water in the vicinity through the ground to the pipes much as a magnet draws iron filings. Once in the pipe, the water is pumped out either manually or automatically to a nearby sewer system.

Prof. R. M. Hardy, Dean of Engineering at the University of Alberta, and Prof. J. A. Harle of the same department say they are pleased with the initial results of the experiment which is under their direction.

However, they say that it will "be some time yet" before success, or failure, of the experiment can be known.

Dean Hardy said the process, if successful, "will be far more economical than conventional drainage methods."

Weed-Killing Chemical To Be Used Extensively

WINNIPEG.—Between 15 and 20 thousand 2-4-D, chemical weed control machines will be in operation to battle the weed menace in the prairie provinces this summer, H. E. Wood, chairman of the Manitoba weeds commission, stated.

The weed-killing chemical will be applied to more than 5,000,000 acres of farm lands in Manitoba, Saskatchewan and Alberta.

So far this year in Manitoba, several thousand trial plots and other 2-4-D experiments have been co-ordinated through the central committee of the commission.

Planning for the attack on weeds was started by committees early in January of this year and many preliminary tests, where the chemical is applied before the crop appears, have been made.

Sus, near the Persian Gulf, is considered to have the longest continuous existence of any city in history—from 4000 B.C. to 650 A.D.

TO EXPORT POWER TO UNITED STATES

VANCOUVER.—Vancouver which last year was forced to buy electric power from the United States, expects to be able to reciprocate in 1949, by selling power to northwestern states.

British Columbia Electric's new Bridge River power development is expected to provide this city with 600,000 hp; and a quantity of this will be exported to the Bonneville Power Administration which supplied Vancouver and part of the lower mainland last year.

Vancouver was short on power last year, and only obtained U.S. electricity through the foresight of officials who had made a deal with Bonneville earlier. The northwestern States were short of power during the winter and it is doubtful if there would have been enough to go around if B.C. had sought a deal any later.

The July meeting of the Floral U. F. W. A. will be held at the home of Mrs. Wm. Aldred on July 14th at 2.00 p.m. sharp. Business at the meeting will include a report of the delegate to the Junior Convention. Anyone interested are cordially invited to attend.

A convention is to be held at an early date to nominate an independent candidate for the Banff-Cochrane riding for the next provincial election. Supporters of the movement are invited to attend this convention.

Ray Lee who is attending High school in Vancouver is spending the summer holidays with his parents at the Home Cafe.

Mr. and Mrs. Henry Johnson and family of Calgary spent Sunday at the home of the former's brother, Norman.

Gordon Fox left here on Wednesday morning to catch the T. C. A. plane and will fly to Ontario where he intends to take delivery of a new Chevrolet car as it comes off the assembly line.

New Bonds

The Bank of Canada announced on Thursday on behalf of the Minister of Finance that arrangements are being made for the offering of a third series of Canada Savings Bonds this fall. Terms of the new issue will not be finally established until later — probably in September. It is expected however that the new security will retain the features which proved so popular in the first two series.

Since the introduction of the Canada Savings Bonds in 1946, applications for the first and second series have totalled more than 3,100,000 to a total value in excess of \$616 million dollars. The decision to issue a third series is based mainly on the wide spread demand.

It was also believed that a savings instrument with the features of Canada Savings Bonds would serve a useful purpose by giving further stimulus to the savings tendency developed by Canadians during and since the war. Present holdings have already rendered more than a million Canadians better able to meet personal emergencies or to carry out future plans. Such individual and family resources are an element of strength and stability in the nation.

Preparations for the series three issue got underway in Ottawa this week. As in the past, the new security will be available for cash or through various methods of installment purchase including the payroll savings plan which proved such a popular savings channel in series one and two as well as in the nine Victory Loans.

Payroll savings directors have been appointed to co-ordinate this activity. H. A. Benham of Winnipeg will represent the prairie provinces.

**CBC TO OPEN PRAIRIE
TRANSMITTERS IN FALL**
The Canadian Broadcasting Corporation is planning to open its two new 50,000 watt transmitters in the prairies early in September. It had been planned to have CBK at

Lacombe and CBW in Manitoba on the air early in July, but the company installing the transmitters has found that additional time will be necessary to get the complicated high power equipment of new de-

sign fully adjusted and tested. Although the official opening will not take place until early in September, it is expected that both transmitters will be on the air before that date in order to carry out necessary tests.

Over \$300,000,000 to be repaid the public

SERVING CANADIANS

THROUGH CHEMISTRY

"Chemistry?"

IT DOESN'T
MEAN A THING TO ME!"

IF YOU WERE a farmer it might seem that
way at first glance. But take another look!

Those fine crops, which mean so much
to Canada's health and economy, often
depend upon chemical fertilizers.
Weed and pest destroyers, orchard sprays
too, are but a few of the services that
chemical research extends to agriculture.

Through good times and bad, the
chemical industry plows a straight
furrow, ever moving forward to create
better things for farm, industry and
home. Look to chemistry with confidence
for a finer future... and to the C-I-L
oval symbol of an organization devoted
to serving Canadians through chemistry.

For instance:
HERBATE
Among the many contribu-
tions of chemistry to agricul-
ture and horticulture is the
killer, "Herbate" that elimi-
nates mustard-weed, dandel-
ions, plantain and other weeds
without harming grain or grass. It is a product of
